- **Core Concepts:** Data Structures, Algorithms, OOP, DBMS, Operating Systems, Computer Networks, API Development

PROJECT

Intelligent Crop Recommendation System Using Machine Learning *Final Year Major Project*

- Developed a Machine Learning-based system to recommend suitable crops based on soil and environmental conditions.
- Analyzed agricultural datasets including rainfall, temperature, humidity, and soil nutrients.
- Applied data preprocessing and predictive modeling techniques to improve recommendation accuracy.

INTERNSHIPS

Junior Intern – Spheronix Feb 2026 – Present

Full Stack Development with AI Integration

- Assisted in developing web applications using frontend and backend technologies.
- Worked on API integration and database connectivity.
- Collaborated with team members to enhance application functionality and user experience.

Python Internship – Saraj Infotech 3 Months

- Developed Python-based solutions and gained practical exposure to programming concepts.
- Performed debugging, testing, and code optimization activities.

AWS Internship – Saraj Infotech 2 Months

- Acquired knowledge of AWS cloud services, deployment concepts, and cloud infrastructure fundamentals.
- Gained hands-on exposure to cloud computing environments and services.

CERTIFICATIONS

- AWS Certification
- Python Certification
